### Quality Management Systems ISO 9001:2000 Certification

The ISO 9000 standard provides the common definition of Quality in Management Systems. Its Primary concern is the process and how the organization manages and controls its processes to ensure that the products meet the customer's requirement. Companies implementing ISO 9000 can be assured of a greater level of control and in many cases profitability within their operation. Those opting for an internationally recognized certification body such as ourselves will also enjoy the benefits of having a credible and experienced partner for their future operations

## HACCP (HAZARD ANALYSIS CRITICAL CONTROL POINT)

The acronym HACCP, which stands for Hazard Analysis and Critical Control Point, is one, which evokes 'food safety'. Originally developed to ensure microbiological safety of foodstuffs, HACCP has been broadened to include chemical and physical hazards in foods. The recent growing worldwide concern about food safety by public health authorities, consumers and other concerned parties, and the continuous reports of food borne outbreaks have been a major impetus in the application of the HACCP system.

Food safety has been of concern to humankind since the dawn of history, and many of the problems encountered in our food supply go back to the earliest recorded years. Many rules and recommendations advocated in religious or historical texts are evidence of the concern to protect people against food borne diseases and food adulteration

### HACCP ASSESSMENT AND REGISTRATION

GCAS will access HACCP based Food Safety Management System in accordance with GCAS HACCP Specification - GCAS134 Issue No 01 "Requirements for a operational HACCP system" which includes General principles of food Hygiene, CAC/RCP 1-1969 Rev.4 -2003 inclusive of Hazard Analysis and Critical Control Point (HACCP) System and Guidelines for its application, Annexure to CAC/RCP 1-1969 Rev.4 -2003.
